### **Career Objective**

A Senior IT professional and developer, with 6 years of experience specialized in Front-end development.

### **Education**

Associate's degree in IT CTI – Colégio Técnico Industrial "Prof. Isaac Portal Roldán";  
Associate's degree in IT ETEC – Cidade do Livro;  
High School diploma ETEC – Cidade do Livro;  
Bacharel Of Information System –Estácio Digital University, São Paulo, Brazil (2022 - ongoing).

### **Languages**

Portuguese	<b>C2</b>
English	<b>C1</b>
Italian	<b>B1</b>

### **Certifications**

Introduction to computer networks - Fundação Bradesco;  
Introduction to JavaScript - Fundação Bradesco;  
Create a Simple Website using HTML, CSS and JAVASCRIPT – Fundação Bradesco;  
Data Modeling – Fundação Bradesco;  
Innovating with CSS – Fundação Bradesco;  
Basic HTML – Fundação Bradesco;  
Ethics in systems development – Fundação Bradesco;  
Software Development – Cubos Academy;  
Soft Skills – Cubos Academy;  
Success LinkedIn – Cubos Academy;  
Front End Development Libraries – FreeCodeCamp;  
JavaScript Algorithms and Data Structures – FreeCodeCamp;

### **Skills**

Programming Technologies: C++, PHP, Java, JavaScript, CSS3, HTML5, C#, Assembly, Arduino, Ionic, Angular, Laravel, Python, TypeScript, React, Bootstrap, SCSS, GIT, ETC;  
Operational systems, Network, Systems Analysis;  
Software management (Linux, Windows, IOS) and apps;  
Computer installation and maintenance;  
Database: Firebase, Mysql e Postgres;  
Office pack (Word, Excel, PowerPoint) and LibreOffice;  
Image editing: Photoshop, canva, gimp and Inkscape.

### **Volunteer work**

Interact/Rotary administrative assistant 30/04/2016 - 20/09/2016.

## **Employment History**

Web Development Freelancer 2018 – 2020.

- Mobile development with ionic v5, angular, scss and typescript;
- Web development with PHP, HTML, CSS and JavaScript;
- Projects using C#, C++ and Assembly;
- Canva, Gimp and Inkscape;
- Software management: Linux and Windows.
- Office pack and LibreOffice
- Database: MySql and Postgres;
- Operational systems, Network, Systems Analysis;

Atitude Comunicação Web and PHP Developer 2020 – 2021.

- Web Development with PHP, HTML, CSS, JavaScript and Laravel;
- PhotoShop, Gimp and Inkscape;
- Software management: OS;
- Office Pack;
- Database: MySql;
- Systems Analysis;

I started my journey as an intern and quickly proved my skills and dedication, leading to my permanent hiring within just one month. During my time at the agency, I actively contributed to the development of several showcase websites for our esteemed clients. Here are some websites that I worked on:

<https://www.paoopcao.com.br/>

<http://www.clubemarimbondo.com.br/>

Agência Zum Web and PHP Developer 2021 – 2022 (Campanha Project)

- Web Development with PHP, HTML, CSS and JavaScript
- PhotoShop, Gimp and Inkscape;
- Office Pack;
- Database: MySql;
- Systems Analysis.

In this project, I had the opportunity to collaborate on the development of a highly impactful promotional campaign website, working in close partnership with both the federal lottery and a renowned drugstore chain in Brazil. Additionally, I worked on the DreamStore project, an online children's toy store. I contributed to the year-end campaign, really similar with the Drograria Santa Marta project.

S2 Pets Front-end developer feb/2022 – sep2022. (MeuPet Project)

- Mobile development using ionic with angular v6;
- Web development using angular;
- Database: Firebase;
- Agile Methodology;
- Sprints programs;
- Git;

In this position, my primary focus was on developing innovative features for a pet owner application. I successfully contributed to the creation of several noteworthy functionalities, including:

1. Lost and Found: I implemented a dedicated tab within the app to facilitate the reporting of lost and found animals. This feature aimed to enhance the user experience by providing a seamless platform for reuniting pets with their owners.
2. BMI Calculator for Dogs and Cats: I took charge of developing an accurate and user-friendly BMI calculator specifically designed for dogs and cats. This feature served as a valuable tool for pet owners to monitor their pets' health and ensure their well-being.

Furthermore, I actively participated in the development of the app's landing page, crafting a visually appealing and informative interface to attract and engage potential users. Additionally, I designed and implemented various dashboard and back-office screens, streamlining administrative tasks and improving overall efficiency. These contributions highlight my proficiency in both frontend and backend development, as well as my ability to work collaboratively within a team to deliver impactful solutions.

Ambisig (Lisbon - Portugal) sep /2022 – june/2023. (SCOT/SIARL project)

- Frontend development using Ionic with React.Js;
- React with Redux;
- Trello;
- Manual testing;
- Bug fixing;
- Git;

During my tenure at Ambisig, I played a pivotal role in the SCOT+ and SIARL teams, where I contributed to the development of two significant systems: a traffic ticket application system and a Coastal Resource Management System focused on adapting to Climate Change Scenarios. These projects marked my first experience with international collaborations, allowing me to broaden my horizons and gain valuable insights into working on a global scale.

As part of the frontend development team, I utilized React with Redux to create intuitive and seamless user interfaces. Additionally, I took responsibility for manual testing, ensuring the functionality and usability of the systems met the highest standards.

By actively participating in these projects, I honed my skills in international project management, frontend development, and quality assurance. This experience not only enhanced my technical capabilities but also fostered my ability to work effectively within cross-functional teams.

Capgemini (Italy) august/2023 – present. (spms project)

- Frontend development using with React.Js;
- React with Hooks;
- Bug fixing;
- Git;
- Webrtc

I am a seasoned Senior Frontend Developer with a demonstrated history of leading and innovating in design and functionality. In my role, I am responsible for guiding and mentoring a proficient technical team, driving collaborative efforts and achieving project milestones. Leveraging my expertise in WebRTC and ReactJS technologies, I specialize in crafting seamless and dynamic web applications.

#### Key Responsibilities:

- Lead a high-performing technical team as the primary frontend developer, fostering a culture of collaboration and consistently surpassing project objectives.
- Drive innovation in design concepts and user interfaces, consistently delivering captivating and intuitive web solutions that exceed client expectations.
- Skilfully utilize WebRTC technology to enable real-time communication capabilities, enhancing user engagement and interactivity.
- Harness the capabilities of ReactJS to architect responsive, scalable, and high-performance frontend solutions that cater to diverse user needs.
- Play a proactive role in the successful development and deployment of projects by leveraging a comprehensive skill set in frontend technologies, architecture, and industry best practices.

By combining leadership acumen with technical expertise, I have been pivotal in advancing the integration of WebRTC and ReactJS technologies. This has led to the creation of dynamic, user-centric web applications that thrive in today's competitive digital landscape. Committed to ongoing innovation, I consistently push the boundaries of frontend development while contributing meaningfully to groundbreaking projects.
